1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-21 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Anderson et al (cited by applicant) or Matouka.

Anderson discloses all of the elements of the claims including a spring 18 (Fig 2) on which the interface recited in claim 1 reads. Matouka also teaches all of the elements of the claims including the claimed return spring means (the outer portions of element 16), the rigid support (element 18 and central portions of element 16), buffer (element 14) and interface (element 12).

To the extent either reference may be later deemed to lack some features of the dependent claims it would have been obvious to provide the missing features in order to make either of the devices in the references more effective for their disclosed uses.
